H. RES.

Recognizing the role of loneliness and isolation in public health.

IN THE HOUSE OF REPRESENTATIVES

Mr. Flood submitted the following resolution; which was referred to the Committee on

RESOLUTION

Recognizing the role of loneliness and isolation in public health.

 Whereas the United States faces increasing rates of loneliness and isolation, impacting the general population’s mental health and well-being for citizens of all ages;

 Whereas the 2019 Cigna U.S. Loneliness Index data reports 61 percent of United States adults are considered lonely, a rise from 54 percent in 2018;

 Whereas the 2018 Cigna U.S. Loneliness Index data reports 41 percent of adults age 66 and older report feeling lonely, and 79 percent of adults age 18 to 24 report feeling lonely;
Whereas the National Academies of Sciences, Engineering, and Medicine reports loneliness and isolation in older adults are strongly associated with greater incidences of morbidity, cognitive decline, depression, anxiety, a decreased quality of life, and an increased risk of early death from all causes;

Whereas in an effort to combat loneliness and isolation, the National Academies of Sciences, Engineering, and Medicine recommends raising awareness of the issue and continuing research into loneliness;

Whereas the Surgeon General, Vivek Murthy, declared an epidemic of loneliness and isolation on May 2, 2023; and

Whereas the Surgeon General released an advisory on the impacts of loneliness and isolation on public health outcomes in the United States: Now, therefore, be it

1 Resolved, That the House of Representatives—

2 (1) recognizes Americans, of all ages, report feelings of loneliness or isolation;

3 (2) recognizes the impact of loneliness and isolation on one's health and well-being;

4 (3) promotes the awareness of loneliness and isolation and its impacts; and

5 (4) supports continued research into efforts for combating loneliness and isolation.
